Can anyone tell me where and how to get the 3 missing maps that i aint got, i already got all the Default maps but not the Flying_Mixes. Please i am near the end of my patience, nobody would help me anywhere else, it's like some great secret Please can someone help me?

DOnt be mad, just update your game with 1.037 and use cp2, install rengaard, then update it, it should scan your game files and install cp1 and cp2 which include the flying maps. After it is installed, you can uninstall rengaard or keep it if you choose.

Now I read the thread, your not very clear, are you.....your looking for the lsd and ldd files not the mix file.
