he is making it Ea exposed or something along the lines of that.

Ty is being stupid, but i just thought that i would come and tell you, he is releasing all of the skins for the aimbot as well.

So i wanted to tell you, no problem with that, is there?

Here is the whole post for you to read.

Hi Boys & Girls..

I have decided to bring WSE back to the light , in order to once again Expose elements within the CNC community.

I raised some issues about aimbots over @ a well known Renegade server called thepits , in return they banned me & made an entire section on me , its a bit of a laught but the joke will be on there server when WSE is back up , with information about Aimbots.

Here is the section they have made about me if anyone is intrested in having a laught..  
<http://renegade.the-pitts.net/index.php?s=905317114d8ce5b4a6ee301f8249ce74&act=SF&f=24>

If people recall the WSE history , it was over trainers & Cheats i told WW would ruin the game , With that said ive been playing rene in my spare time for the past month , i actually won thepits ladder competition.

I Was upset @ the cheats i seen used , like a MOD that takes out the GREEN TINT from your sniper scope & The Black shade , combine this with a Skin package & the clickbot & U have 1 version of a usable aimbot.

Any sniper not using the skin is at a dissadvantage , I basicly said to them after winning the month that i was sick of it & i was going to release the infromation , I had already pled with the owner of the server to put in place some policy for the usage of the sniper scope MOD but he said it wasnt enforcable

instead he has banned me & made that section in an attempt to make me upset , its only done the complete oposite , im now motivated & WSE is going to return.

WW learnt the hard Way & i guess its time to make another example , WSE really never got to Rene , & I appoligise for this to all our hardcore fans out there , Rene will be fully covered this time in the wse articles.

The original post that got me banned & was the reason for making the section on me is located here..

NO is the answer.

There is no Aimbot for Renegade. The only evidence we have a faked screenies and whispers of rumors on forums.

There would be some snippet, some non-working download link SOMEWHERE on the internet that has an aimbot at the other end.

There isn't.

He uses the skin mod for the scope, weve seen a screenie he posted. He also keeps saying "I use the alpha 1.02 aimbot with the extra bullshit extension blablabla" its really making me think hes covering up.

This deserves a sticky. Or an announcement. Ty Ill try to catch you on msn.

WSE once relaunched will be back up until the destruction of the WWW or the End of the World , or when I die , which ever one comes 1st.

I should never have given up WSE , but Lurky / Mark talked me into giving WSE to WW/EA , however I signed no contracts , EA doesnt really talk to me much about WU so as i see it ,its really none of there business ,and i dont care if my Abarrat nick is banned from WOL.

msgtpain thinks im some little kid , even thou im older then some of the idiots posting giving me sht , snipegod1 is cheating , i mean hell i found the SS of a guys modified Skins that lead me to belive that cheating was going on , at the pits..

Here it is , i found this @ thepits b4 i even mention aimbots..

Then i noticed Snipergod1 Admiting to using a MOD that takes out the GREEN TINT & The Black shade! Its not Very hard to do the Math..

GREEN TINT REMOVAL MOD X Skin Package X Colour Clickbot = snipergod1

Pain says it cant even be enforced , lol Well when they allow assholes to post the SS as i have show , then clearly It wont be Enforced when the Administration is supporting it.

IN a way Thepits is Acting Just like WW did when i started WSS.

I gave too much control to other people when i had WSE up , things will be a little diffrent this time. Alot of the Old guys like Lurky , Weap0nman , England , have shown there true colours to me so my level of awarress to people like these guys is Hi.

Lurky only wanted WSE to close so he could get his nickname back , in the old days if anyone gave me shit on a forum lurky was the 1st guy to defend me , but since he has been @ thepits he watches people give me sht , i cant really speak up & When i do speak up on a subject i am banned.

I Won there pissy tornment & Still didnt get any respect.

WHY ? Because i was the Leader of WSE?

Well if thats how they want to play , lets bring back WSE & See how there aimbot Azz are lol

And Weaponman , I noticed u giving me a little shit , Was very suprized!

Then again you kiss Pains ass so much u prob do know whats up his ass & whats not lol.

Ive been talking to Hileman again @ ANF , both guys will be helping with WSE , aswell as Revolt coding the OGC Aimbot DLL ,with myself assisting.

I Really wish to do an article on this other aimbot , IF Reece will give me some site space i will do an article similar to the WSE Articles i used to do.

One thing thepits forgets , WSE was the biggest group WW had ever seen , the most powerfull group WW had come up against , i have recieved letters where WW state that the Group WSE has cost them thousands of dollars in Upgrades etc due to the exploits we used on there servers.

WSE never got to Renegade , When i go to Rene & play for a month thats when WSE has got to Renegade , A few WSE staff played there but none of them really looked for cheats , besides PSY.

Im not sure if im going to change the name , im still considering it , reason i wish to bring WSE back is because WSE is well known , people desire WSE work again , it was a funny site , good information database and generally a good site to view. Entertainment wise.  
If u search google for WSE you can still find articles about the group.

And dont confuse Powerfull with hackers lol WSE Were not and are not hackers , simply because we posted Relays & Trainers doesnt make us hackers like some of these idiot websites claim.

Ive learnt alot of lessons from the old WSE , so you can be sure that none of the old bs that used to go on will be going on this time , the key players of WSE is Myself & Revolt.

Staff list prob wont be public this time , still unsure.  
Any of the guys i know intrested in being on the staff list let me know.

I Decided to start the skin package myself , seems like no one has made one publicly for this aimbot , so i did a mobius for a test , lol it turned out quite well

I havent decided on the URL yet , i will possibly purchase the Domain this week after i make some decisions.

I Will never get the domains back from EA , they are also protecting the domains from Peter ,as he wants them aswell. ( Quite sad really when i invented WSE )

It will be a WSE domain , u guys can try guess one up lol , cause thats what im going to be doing this week , it took time to think of the name WSE < it was changed from WSS to WSE after 1 yr contemplating about weather to change the name from Westwood Studios Scum , to Westwood Studios Exposed.

Maby WSE will be WSEA , Westwood Studios Exposed Again.  
Or WSEAE Westwood Studios Electronic Arts Exposed , or just EAE Electronic Arts Exposed.

I think of the Abrevation b4 i go looking for the domain.

Comments & Suggestions Encouraged by all ( Not you pits asswipes but u wont last long in here anywayz , :)looks @ Reece )

Ya i only need a couple of megs to do an article , i would like to do the Renegade Colour Aimbot Article , i do very good articles , and spend alot of time on little touchy things , just ask Reece or if u can rember WSE pages , the TMK Exposed etc i did all of them.

14mb is the Whole site without any extra content , so ill wait for the server b4 posting that up , i

would like to do an article on the aimbot for rene , And u guys host it , I have no domain link as yet so i wont be putting any links on it , just character credits for the work. IE Author Abarrat

And perhaps a mention of the Return of WSE.

1 page hmm , 1mb would be heaps for 1 page.

If u guys can get me an account with 1mb , just PM me the FTP site address , username & password & i will get to work today, as you can see ive already started the Skin package that sniper cheats are already using , ive got the colour aimbot and the MOD that takes out the green tint!

Im all Rdy to Go commanders lol

My 2 cents...hell yea..lol go with EAE since there branches are all but non-existent

EAE..hmm ya could either go with the anti EA side off things seeings WW doesnt exist anymore, and EA do literally nothing about cheat, (westwood did some things they were just jokes)

Or you could just go with a sort of "Westwood is gone, told ya so "sort of thing going over the history, with a profile page on every main fag involved with it, etc allwell we'll see I guess.

Oh and Ty I'll have a talk to ya on MSN about hosting arrangements, I'm sure we can work something out.

thx all , i will keep u guys updated.

The post has been removed , they have unbanned me , im waiting for an email from the site owner , im thinking there not so bad after all maby they want help with this skin modifications problem ?

EAE will prob be the one , anyone goes out & buys it i will make sure u pay the price , lol so dont do anything stupid now boys & girls lol

This post will die until i get WSE back up , if i do get it back up.

WU is still #1 priority b4 WSE.

You ask why i went to that site?

I got a link in a email from one of my m8's, it is a good site to get the games i play no-cd cracks the day the patches come out, but the bad thing is they have hacks that n00bs get and cheat their heads off
