Now i'm all confused, I do use custom scripts and because I would have the mod, I can hear it, but when you mean the client must use custom scritps, do you mean other players? or me? Anyways, I'm fine with my method, but I might try out scripting it to work.

Rereading reborn's script idea doesnt seem so good, because if i time it right, it will only play the sound when I get in/out of the stealth tank, I can already do that by renaming wav files for `_start.wav/_stop.wav` and it is already perfectly timed....reborn, does your way work whenever the stank goes into stealth mode, or just get in and out? Just double checking.
