i'm a barbie girl in a barbie world
lol how can he move when he's made of plastic, enamel and stuffed with air?

The commands is like so:

cmsg *playername(or is it number?)* *red* *green* *blue* Message

The colours are from the rgb spectrum as far as i know. Simply a number from 0 to 255 is required
for each, showing the intensity of the colour.

EDIT: for pink he would use the colours 255 0 255
