Imdgr8oneBecause that is what all the dipshits do. "Oh he said something about my model being dumb, I'm goign to go hug my teddy bear and use thousands of curses and words taht I don't know the meanings for becuas ethen I'll be big!" CaptKurt, you used to be a good guy, but lately you have been quite an ass. You aren't God, Ack isn't god, I'm not God, but yes, for this subject, ACK's name needed to be used.

Because I'm trying to get some of the little minds in this community to be responsible with what

mean read any thread here and so many have other people answering questions that were posted directly to some one else, not them at all. Or they try to post the answer to the problem without knowing a clue of what they are even saying,

a place to share your ideas on mods, maps, a place to come and give help or get help on mods, maps. So many people send me e-mails all the time, because they are afraid to post here for fear

helping hand from all of us to get this to be a helping, happy place again, me, you, and everyone

any more.
