I dont play halo, seriously, I dont know what the game is about, but from Tv ads, and watching my friends play, I fell inloe with the armor...

Really whats the difference between master chief and spartan? They both look the same to me, but different colors, I know some people who make the armor paint constantly to change their color, someone went from blue to red and it looked good, ithink maybe I'll either do a tan-ish green or a redish pink like the halo 3 screenshots....pink ftw....(although I'd rather actually have tanish green)
