The Utilikey is awesome. Why would you want separate screwdrivers when you can have an all-in-one tool? I have both the Utilikey and the T7 Multi-Tool On my keychain. They have both saved me a lot of hassle on many occasions.

P.S. I don't have an issue with having a "bulky" keychain since my car has Intellikey, which means I don't have an ignition key, so my keyring is always in my pocket
