Rocko wrote on Thu, 04 October 2007 19:27The possibility that god created the universe does not prove that the one you know from your magic book exists as you think he does. That's the smartest thing I've seen you post.

I think that there could be other, intelligent life out there. Think about it.

I got this great thought from 'Animal House': Galaxies could be all around us. Small enough to fit inside of one atom.

With that possibility, it's impossible to say that God or a 'god' didn't create several different forms of intelligent life.
