---

I just installed renegade and renguard on my new computer and when renguard is going through the scan for the core patch 2 it disconnects me with this error message:

RenGuard has detected corrupt files. In order to install Core patch 2, you need to download fixed copies and extract them to your renegade directory. Mix files (maps) belong to the data directory.

there are 2 links it gives me to click but they both apparently don't exist cause they don't work.

what should i do?
