I have been posting reply's recently that have not been relevant to the my problems of modding...beacuse well my comp got wiped and i lost most things.

umm i managed to get the FDS, levelEDIT, GMAX etc all working and fine with he scripts 4 levelEDIT 2 whew

But now i come to setup my FDS installation and it wants a serial number... I mean i put in the Code that is in my Renegade game case and it will not let me proceed to the next step of the setup

I had this problem once and a very close and deer mate helped me through it all the way, he gave me a code from somewhere(he never said where, just pasted it 2 me in MSN)

I know you can make one up but NR and my FDS won't like it apparently...so basically please can someone out there give me a legit Serial Number please....

IDC where it comes from, AOHost.com(I looked around there there and i could not find one)

To explain my prob further i have attached a SS below->

Registration Information

In order to run the Renegade Dedicated Server dedicated server, you must request a special serial number from Westwood Studios. If you do not have a serial number, request one at: <http://renegadeserver.westwood.com>

Please enter the serial number and the associated Westwood Online login name and password. All fields must be filled in to proceed.

Westwood Online login name:

Westwood Online password:

Confirm Westwood Online password

Serial number:

Serial from my case is in and all other fields filled in correctly, yet the Next button remains inactive
