ok to start off i have read a post on this subject but i dont know what they are talking about when they say TFD...My problem is:

each time i hit multiplayer it tells me that my Westwood internet is not compadable with my version or soemthing like that.i have downloaded Renegade 2 times and i have just downloaded the internet part..nothing is working for me and i have looked all over the web for help. i also installed RA2 to see if the internet thing would work, but no go..im pretty sure i have done all the patches, but please post anything to help
