Thanks alot man, but i am quite sure u did not make that in GMAX

I mean, i don't even know what the tools do->You start and Make a box raise it shape it and it's all really really fast!

You did not explain much...sorry man but that tutorial is not really going to help me 4 what i need.

Yet again, all i need people a in depth tutorial on how to Edit and or Create doors in GMAX/RenX

Thanks anyways
