What u mean slap my bro? He type all of that post...i can't prove it no but still it does not change the fact that he downloaded and placed it in the Renegade Data Folder (PKG File)

And guess what, it did fuck all when he loaded LAN and selected the mod with a few maps he had to put in it(There were no maps)

So go ahead and slap him, i do not like him!

If i could get him to make an account i would be he is so fucking Stubborn!!!
