Okay thanx alot man, i appreciate that it could really come in hand but umm how do i do it and my main question WTF?

I got XCC Mixer cus well what did it say as i downloaded it "With this mod accesory you can extract files of nearly any type from a C&C game and change .lvl files to MIX"

Or something in that genre...so if that program will not let me simply convert the .lvl, .isd & .idd files to MIX 4 renegade?
