Muad Dib15 wrote on Tue, 16 October 2007 19:26Base Pc. got it in march. the pentium II could barely play ren with the graphics turned down all the way. needless to say, i couldn't play online

Pentium 4
base graphics card*
1 gig ram*
40 gig HDD*
monitor from 1997   no seriously, its that old
CD rom and DVD read write
Microsft office 2007  bitches

cost for all this...$200

*going to upgrade
Pssh old tech

2gb ddr2 ram
amd x2 5000+
Dual SLI 7600 512mb, which means I have two 512's not 256
200gb HDD 7200rpm

thats the main crap in my main family PC...which is actually more of a gaming PC for the seriously graphical games.
