OMG just thinking if we ever made a post call Ren Venting, It would go on and on for about 25 pages.

Problem with on-line gaming is that it is available to all people who have the game (in question, Renegade or no) and an Internet connection. Having common sense or base intelligence sadly isn't mandatory hence the supreme lack of intelligence we see on-line nowadays.....Having said that, without these people, n00bstories' reason to be would be no more

[EDIT] Sadly I missed the spell check button, and had to edit
