---

I have have this time followed every single action u do on screen Oblivion165 and Im telling ya, i just can't get around a certain part that's hard to explain here...ironically u seem to press a key on the keyboard but i can't figure out what!!

(P.S)

Im trying to think of a way that i can add Chainguns to the Transport Choppers in LAN so that if ur not piloting the vehicle u can use a chaingun in 1st person view!!

Is it possible?
