Hello!

I want to know what exactly I have to do to remove the Chem Warrior's red helmet/visor.

This is the skin:

I deleted the red visor texture and it showed up all white in-game. And making it black had the same effect.

My understanding is that I can make that visor part transparent.

I seen a skin that did that:
http://jelly-server.com/nuke/modules/skins/files/Characters/nasachem/nasachem.jp g

So, if I do the same but increase the transparency to 100%, then the visor won't show up even if it's there.

So, can someone guide me through...how do I make that part transparent?
