Like we don't already have about 140 servers with about 100 24/7 empty ones

come gimme a break, we've never done a server before and it will be nothing else but a learning curve

^fixed

Brenbot (<http://new.brenbot.com>) includes a "gamepsy connector", so if you use brenbot, you can connect to both WOL and Gayspy.

a000000 are all taken for a good reason . One very awful person tends to sell them for 50 euro a month, while he took it for free. I don't think you have any other chance to grab one.

This is an old game with some established clan/communities, maybe some of them could offer what you're looking for?
