Ok here's the deal. I've downloaded XCC and DXT, and i have Photoshop CS3, so there's no problems there at all. But when i go to Renhelp.net, i can only find tutorials explaining how to texture /re-texture Renegade guns, but not how to make your own textures from scratch. I found this untextured M41a and i wanna texture it. Any place where i can find tutorials?

Any help would be appreciated,

Dreganius
