I deleted the two thing it works but it acts like it is sorta in a way in windowed mode when it is not other words it does not fill up the whole screen and just kinda put it's down and the res is at 800 x 700, there might be an easy solution but i can't find it I'll try playing around with the res for a bit when i had it on 800x700 before when it worked and i didn't have to delete anything that res filled the screen and worked well

EDIT: I played around with the res I put it to the highest it fills the screen but all the text and buttons are too small
