Well, it was supposed to be released yesterday sometime, but appearneilty a version was leaked and now a few official sites have mirroirs of it, the fastest one? Try:

^It's 1 SP Map, which is supposed to be about 45min of gameplay, and it also comes with the mod tools for the game, enjoy.

P.S:I pray EA is not using this game to make ren2, because of the fact it is so much like bf3, another C&C FPS with crytek would just be bf3
