bigwig992Even I want to play it...Someone want to send me a free CD, and an account payed for 3 months?

Just get 25k Outfit points and you get a free Radeon 9700 better than 3 months free. By the way did you get a month free with the game when you bought it? Somone reported a version with 3 months but I don't know if it cost more, would have thought it would be some in-store deal though.
