JavaxcxK9Trooper1. I have seen many people with 100+ kill games since Renegade came out. I believe Java was one.

In a 20 man, non-sniper server. Thanks for the recognition, but I have to confess that it was a mechanical aimbot which I used. It consisted of infrared sensors, small rollers, and a plastic ball. These were tied with various silicon apparatuses which connected a pressure activated piece of plastic to my computer.

Fancy.

LOL, I had to read the description twice inorder to figure that one out. I need more coffee.
