Give our troops enough time to rebuild what was bombed, reestablish order in the communities and develop enough government to leave them more than an Al Queada power vaccuum.

If we don't, we are irresponsible and will be back to do it later when the fundamentalists seize control and use the assets of Iraq to perpetrate their agenda. (See the Nod World Domination handbook page 33 in the section about using media)
The West is the reason the Iraqi government is so feeble, which is why we're getting such a good deal for the "assets of Iraq" right now.
