Okay right i followed the Heightfield mapping tutorial that's on Renhelp.net
Right down to the point where he goes "4a. Texturing certain areas of your map - Yay! One more chapter to go!

Quote:

4a. Under base material, find a empty spot and click it, and press "Material Settings".

b. Another box asking you what texture and type of ground should show up.

c. Change the option "Vertex Height" to "Vertex Paint".

I do not get the part where he says Vertex Paint, the closest thing i have to do with that is Texture Paint

So when i select my stuff i want it gives me loads of "Westwood" tiles...

The SS below will explain more of my problem

Material Settings

Use the controls below to specify the texture and mapping scale to use for this material.

Texture Filename:

UV Mapping

Tiling: meters per tile

Mirror the UVs

Surface Type:

Just started to try and paint my Mountain sides to look like ICE or SNOW and it gives me Westwood tiles instead
