FalconxlVis is fixed.

I have to run the Granulartiy at 2 or it'll take almost 2 hours to do all the manual Vis points. I've run the Vis 11 times with varying settings.

Anywho the maps ready.

http://falconxl0.tripod.com/wasteland.html

If anyone else wants to host it go ahead. the bandwidth on my site its not good.

update

Got the problem with Renmaps resolved. It should be available there by tommorrow.

If that's the case then it means your VIS screwed up period. :-\
