I installed RenegadeFDS with BRenBot 1.52 FULL 1 day ago and it works fine (got him on WOL). My only problem is that he says in the BRenBot console that he has loaded the plugins, but when i try to use the funsound LEFT or FUN he doesn't make any sound. Also if i ask for my rank ingame he says that there is no rank data found for my account.

All these plugins have i downloaded from: <http://new.brenbot.com> and i have placed them into the Plugins folder. The README's have i placed in the Docs folder.

Pls help me out

EDIT

I worked it out by myself a bit and all the plugins are working fine now. I did added Jukebox now and it works also with funsounds etc. But the ranks doesn't work still. I got rank version 2.03.

Pls help

EDIT

Finnaly it all works Even the upload to my webpage works great.
