Commando Burton wrote on Wed, 05 December 2007 23:34Okay, I am having a erorr with the no game-pending patch it says it pached it but it does nothing.

What do you expect it to do?

You download it, run it, it patches the server, allows a game to be played even with just one player.

But, the first player will have to leave and rejoin when he first joins it, sometimes.
