The only mice I buy are the \$10 Logitech wired mouses. I don't like wireless mice, I think they aren't powerful enough. I notice when i move the mouse around really fast playiny a game I might pick up the mouse just a tiny bit and it doesn't read it. Never have that problem with my wired mouses....

Im sure a lot of why i don't like wireless is just because I THINK they lag...when i'm sure they don't.
