No because EA didn't feel like animating its legs because they are lazy bastards so they just make it a normal lame ass tank.

But seeing as they are reintroducing the Titan... your post is completely inaccurate.

Lies. They only did it because they knew it would make people like you buy the game.

Nice assumption, I own neither game. That's still wrong since they have to animate the legs.

Well, you're still a homo.

I'm a homo? LOL. Creative.
