PC Gamer Mod Of The Month: Red Alert A Path Beyond  
Second time's the charm? Renegade may have turned most people off the idea of a Command & Conquer-flavored shooter, but a team of modders has forged ahead with Red Alert: A Path Beyond, regardless.

This multiplayer total conversion of the Westwood 3D engine used for Renegade is set during the alt-history WW II recounted in Red Alert, so it features most of the military hardware depicted in that 1995 classic. A beta version with six maps and a full section of classes recently debuted online.

I sometimes get an issue of PCG(PC Gamer) and this month I noticed at the bottom of page 122 APB was mod of the month I'm not sure if this is old or new news but anyways, Congrats guys
