Zion Fox wrote on Sat, 29 December 2007 20:58: There comes a problem though.

You need to use force to move your mouse, and some of that is downward force. I don't know about you but I like to rest my HAND on my mouse.

If you do this, it will defeat the magnets altogether unless you use magnets strong enough to repel each other with a HAND resting on it.

Then, with that, as soon as you take your HAND off, your mouse shoots into the ceiling...

And the best part is when your HAND are sweaty from a heated battle and it slips out of your HAND and hits you in your face at 50mph...

I think this is starting to become a bad idea... Why not just use a black cloth instead?

I fixed your post, no thanks necessary.
