Zion Fox wrote on Sat, 29 December 2007 22:24The point I'm trying to make is, our games don't require Renegade to be installed, they're standalone, whereas your mod required Renegade to be installed.

Quite a difference, no?

Hence why I said "games" and not "mods".

But people only really play renegade's online games. APB and the others don't really get much for players on their servers, so if you want a good C&C multiplayer game you pretty much have to buy Renegade.
