Jargh193 wrote on Mon, 07 January 2008 12:26 I've never had it do that to me. I have had issues where someone RGs me and it says I'm not running rengaard, even though I am, I have also RGeD myself at times and get the same message. Minor problem there though.

I would like to know if it is possible for RG to scan the system processes to search for known cheat programs. Not even sure if this will have any negative effects on gameplay or if it is possible.

RG 1.04 which is/was work in progress (it's hard to find a dedicated coder that works for free) and had memory scanning. Unfortunately, afaik it's (more or less) on a hold due to lack of a dedicated coder even though it was "nearly" finished.
