ok so i've installed this game so many times on vista. and they say it runs smooth on vista. so
every time i load it up, it works, but when i restart and than go back in, i get errors like wont load it
doesnt say anything but just completly doesnt load. and when i install "shortcut to desktop" it
doesnt come on with 1 on the desktop.... *weird* and the other thing everytime i load online it
keeps on kicking me off and saying my account is being used in another location. pleas somebody
help me out.

thank you.
