Subject: Vista problems is my guess.
Posted by Speedy on Sun, 13 Jan 2008 13:56:54 GMT

Hello, I recently bought a Vista comp and i managed to get the installation complete after a few attempts but now I cant seem to get into Renegade.

I get the message:

Renegade has stopped working
Windows is looking for a solution.

Im running the game as administrator and compatible mode: XP sp2.
but still no luck.
