---

I am having an odd problem where sound works perfectly in the game but there is no sound in the movies, any movie not even the intro.

I purchased renegade in The First Decade box and have updated it to CP2, scripts 3.4.4, RenGuard 1.0323, and the version of the exe is 1.4.0.

I am currently on Mission 7 and would like to hear the movies. I can connect to the Internet and play multiplayer so I have no idea what is causing it.

Any help?
