Basically saying:
1. Use a font you have closest to that, it's a basic style, I'm sure you can come close.
2. You fail at Google searching.
3. It's a little annoying that it seems like you can never do anything for yourself, so you always have to make a thread asking us. Furthermore, it seems most of your problems are design related, so why not find a nice design forum to join, I'm sure they'd have more answers than us here at Renforums.
