Hello,

I am looking for decent RTS games that are set in space. It necessarily does not have to be old or the newest RTS...anything where the setting (maps) are in space and other planets.

It could also be a economy/space trading-civilization game. If it has units and factions, then great. If not, still ok.

I am searching for some titles like that. But if anyone knows a game(s) like that or played something like that, please tell me.

Much thanks.
