Can someone explain to me what exactly makes light tanks good...? It appears to me that a stank is not only as powerful, but is almost as armored and as speedy as the light tank.

So tell me:

1. Is a light tank more powerful or less powerful than a stank/med?
2. Is it faster than a stank?

Is it pretty much just a mini-med tank? I fail to see the superiority of the vehicle vs. a stank because I never see any light rush's done. PLEASE. Prove me wrong.
