JPGs work fine for me. I save them in 5-scan progressive format with usually a 10-12 for image quality in PS depending on the size. I can keep most of my 1280*1024 screenshots near 512K at max quality this way.

Nothing wrong with n00bstories iamge uploader either, I don't see why anyone here wouldn't use it. The only thing it could possibly need is the ability to upload multiple images at once.
