CNCWarpathRight now we need texture suggestions, please go ahead and give suggestions to improve textures, it doesnt matter what texture it is u think would look nice because our texture team can always produce new ones.

For the barracks: Make the texture of the roof wood, instead of that stripped texture. Replace the texture of the wooden parts of the beds with a wood texture that's smoothed/dodged/burned/etc.

(Make the barracks a little longer with some more beds/whatever in it, and why exactly is there a concrete wall inbetween each bed?)
