also try spyware doctor, if you ask me its better that spybot s&d but its not free. or atleast not free legally check torrents for it or something if you are interested. i have been using it for a while now and even though i got to use it first as an illegal copy it proved to me that it is worth paying for.

actually i like alot of the pccillin software, like spyware doctor and the full pccillin center with firewall antivirus and all that stuff. imo these two are worth paying for.
