Quote:An administrator can customize your Temporary Internet Files settings and prevent you from changing them (for example, by removing the General tab from the interface in the Internet Options dialog box). If you cannot access the Internet Options dialog box or the General tab, contact your administrator for more information.

How can i do this?

And if i did do this then could my dad change all the settings and screw about with it? He's not to good on the technical side of things.

Oh an my IE version is version 6.

Opera has a very easy way to do this. Switch to Opera.
