sorry to bother you but i format my pc and reinstalled Renegade ... then patch 1.037 .. then Renguard with auto core install option on .

it was working but like no core patches and still need my cd . so after a few days i go DL and install CP1 + CP2 + script 344. after all this i can go play renegade BUT i cant enter vehicules , when i try to enter i kinda " stick " to it for about 3-5 second w/o being able to move away from it but can look around .

So before uninstalling and reinstalling w/o the core patches i decided to try asking here .

thanks alot for your time

Try exiting and reentering your vehicle a few times. That usually clears it up for me.
