Subject: RxD beta testers
Posted by ViPeaX on Mon, 18 Feb 2008 01:47:24 GMT

Well, to decrease the WTF posts a little:
RxD is a download package for the demo of Renegade. Basically it converts the demo into the full version of the game for free (If you think we are cheap bastards who can't buy a full version, so be it, but keep in mind that we can pay for a server which specs aren't important, but probably more decent than most full version servers). However, soon (looking at where we are now, the beginning of march) we will be releasing a new version. This will include a whole new client, auto-updater & anti-cheat.

Now, because we don't like to release beta programs, we need a group of dedicated gamers who would like to participate in a beta team.

Requirements:
-You like to work in a team
-You are online fairly often (few times a week)
-You are willing to spend time & effort in the beta testing
-You would love to make this awesome game even better
-You don't need to google when someone says 'x64 OS'.
-It would be great if you have a good experience as a server mod, because the most important thing is the anti-cheat testing

Please keep the topic clean from posts like:
LOL DEMO, HA ANTICHEAT L0Z3RS et cetera

If you are interested, please shoot me a PM.

Happy gaming
