Looking across the EA online store, I decided I'd buy/download Tiberium Wars. I've played the demo and have been itching to buy it for the absolute longest time, but put it off because I've been building a new PC. Now that I have it, I need games! I've already made up my mind to download it since my next week or two are a little busy and I may not get to drop by a store, and would rather get it now than order it and wait anyway.

Anyway, my question isn't whether or not I should buy it this way. My question is, should I also get the Kane's Wrath expansion with it? Note that I play these games mostly for skirmish/campaign (I know, I heard the campaign isn't the best), and not mostly online, but will try online a bit. Anyone try Kane's Wrath? Is it good? What does it add? Sorry for all the questions, but I just want to know if it's worth the extra \$30 on top of the \$60 for Tiberium Wars.

Edit: DOH! It's pre-release. Nevermind. I heard this and that and thought it was out already.
