## Subject: HELP!!!!
Posted by Kieran on Sun, 24 Feb 2008 00:02:02 GMT

Please if someone could answer this for me it would really help me out cause this looks like a awsome game. Well when I click on the multiplayer interenet it comes up with a name and pass that I had typed in when I first got the game. Well I now realise that it must have already been taken cause whenever I logg in it says error and then shows me no servers. Now I could have fixed it if I didnt tick the box which saved my info. Now I cant delete it or change the pass and whenever I type in a different nickname and pass it cancel's the login button so nothing will happen if I click it. PLEASE HELP ME!!!
