No, a typical excuse by a n00b would be "YOU CHEATED," I rarely see a n00b use that "excuse."

Besides, this debate really isn't valid, since, logically, skill is based on perception, and opinion based in this topic, and you people are arguing over what skill is.

Also, I haven't played Renegade in quite a long time now. I don't really care if I win or lose a game either, it's a game. Games are for fun.
